SUMMARY

Software engineer, 4.5 years in Munich on Java products (Spring Boot, MySQL), MSc in Artificial Intelligence. I build backend and full stack features and keep the quality up: TDD, CI pipelines, a SonarQube gate on a large codebase, test coverage from zero to above 95%. In my own projects I also work with TypeScript, Python and LLMs. Getting something to work is one thing, keeping it working is another, and I want both.

SKILLS

Programming Languages: Java · Python · TypeScript · Dart
Backend and Frameworks: Spring Framework · REST APIs · NestJS · TypeORM · Swagger/OpenAPI · Apache Wicket · Apache Tomcat · JUnit · Maven · gRPC · Protobuf (Buf)
Databases: MySQL · PostgreSQL · Flyway · Liquibase
Build, CI and Quality: Git · Claude Code · Jenkins · GitLab CI · GitHub Actions · SonarQube · TDD · CI/CD · Agile
Frontend: React · Next.js
Cloud and Infrastructure: Amazon Web Services · Docker · Kubernetes
Machine Learning and Mobile: Hugging Face Transformers · MLflow · LLMs (Ollama) · PyTorch · TensorFlow · OpenCV · Flutter

WORK EXPERIENCE

Full Stack Developer · Convien GmbH, Munich, Germany | Mar 2025 – Oct 2026

- Shipped features end to end, from the Wicket UI to the Java backend, for a meeting place optimizer on a large codebase running on Tomcat, held to high availability and sub-second response times.
- Brought in SonarQube and led the cleanup of code smells, vulnerabilities and technical debt: more than **1000** critical and high impact issues when I started, zero when I left.
- No unit test coverage when I joined. Raised it to **95 to 98%**, and owned the validation pipelines and the testing process behind project standards.

Software Developer · TESTIFI GmbH, Munich, Germany (Remote) | Mar 2022 – Mar 2025

- Shipped an Android app in Flutter, then moved to backend Java to build QualityOps, a tool for evaluating and visualizing software quality metrics.
- Wrote the core QualityOps features with TDD, from stakeholder requirements, and reworked the algorithms behind them for speed.
- Worked on CAST, a cross team test automation project.
- Employee of the Month, March 2024, for bug resolution speed and code quality.

Deep Learning Mentor and Teaching Assistant · Maktabkhooneh, Tehran, Iran (Remote) | Jun 2021 – Mar 2022

- Taught and mentored 100+ students in reinforcement learning, CNNs, neural networks and deep learning, part time next to my main job.
- Co-developed the curriculum, adding real world applications to the theory.

Machine Learning Engineer · danaXa, Canberra, Australia (Remote) | Jan 2021 – Mar 2022

- Built a resource efficient computer vision pipeline on a Jetson Nano with YOLO object detection, for low latency local video analytics and automated occupancy monitoring.

AI/ML Researcher and Project Reviewer · AUMS, Abadan, Iran (Remote) | Jun 2020 – Mar 2022

- Reviewed deep learning projects in medical image analysis: model architecture choices, training procedures and evaluation metrics.
- Gave algorithmic feedback that improved model accuracy.

PERSONAL PROJECTS

LLM Listing Assistant
github.com/sdrfsh/ev-listing-auditor · Live demo

- Full stack app: a seller describes changes to their electric car in a chat, a local LLM (Qwen 2.5 on Ollama) turns the text into suggested edits, and an employee confirms or rejects each one.
- NestJS and TypeScript REST API with TypeORM, PostgreSQL migrations and Swagger docs. Next.js and React frontend. Docker images pushed to GHCR by GitHub Actions and deployed on Kubernetes.

Daily Journal Sentiment Analysis (private GitLab repos)
Medium write-up

- Python service that rates a day from journal entries (English and Persian) with Transformers models and a local LLM on Ollama.
- gRPC API with Protobuf (Buf), MLflow tracking, Docker image, GitLab CI that publishes on each version tag.

EDUCATION

MSc Artificial Intelligence and Robotics · Amirkabir University of Technology, Tehran | Sep 2017 – June 2020
Thesis: Designing an Embedded System for Activity Recognition using a Surveillance Camera. No public dataset existed for it, so I collected my own.

BSc Computer Engineering · Isfahan University of Technology, Isfahan | Sep 2011 – Sep 2016

CERTIFICATES

- Design Patterns, University of Alberta
- Object-Oriented Design, University of Alberta
- Agile with Atlassian Jira, Atlassian University
- Version Control with Git, Atlassian University

LANGUAGES

Persian (Native) · English (Fluent) · German (B1 telc certificate, B2 in progress)
